# **100 billion energy storage policy**

## Overview

---

The energy storage industry has announced a historic commitment to invest \$100 billion in building and buying American-made grid batteries, including capital for new battery manufacturing facilities and procurement of American-made batteries. This investment represents a clear pathway to supplying.

The energy storage industry has announced a historic commitment to invest \$100 billion in building and buying American-made grid batteries, including capital for new battery manufacturing facilities and procurement of American-made batteries. This investment represents a clear pathway to supplying.

WASHINGTON, D.C., April 29, 2025 – Today the American Clean Power Association (ACP), on behalf of the U.S. energy storage industry, announced a historic commitment to invest \$100 billion into building and buying American-made grid batteries. This investment is expected to fuel the creation of.

The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, the American Clean Power Association and company representatives said April 29, 2025. Courtesy of Salt River Project The U.S. energy storage industry will invest.

Clean energy trade body American Clean Power Association (ACP) announced a commitment on behalf of the US energy storage industry to invest US\$100 billion in building and buying American-made grid batteries. This includes capital for building new battery manufacturing facilities and procuring.

The American Clean Power Association (ACP), on behalf of the US energy storage industry, on Tuesday issued a commitment to invest USD 100 billion (EUR 88bn) into US-made grid batteries. Gridstack - Battery-Based Energy Storage System. Image by Fluence. The pledge includes investment in new battery.

Members of the US energy industry has committed to investing \$100 billion over the next five years to build and buy American-made batteries for large, utility-scale deployments of battery energy storage systems (BESS). Executives from the American Clean Power Association (ACP) and several

utility.

At the end of April, the American Clean Power Association (ACP) announced a \$100 billion commitment to building new battery manufacturing facilities and buying domestically produced batteries for the grid. The press release expanded on the multiple benefits that will be achieved, “The industry will. Will US energy storage industry invest \$100 billion in batteries?

Courtesy of Salt River Project The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, the American Clean Power Association and company representatives said Tuesday.

What does ACP's \$100 billion commitment to domestic energy storage look like?

The industry’s \$100 billion commitment to support domestic energy storage production “demonstrate [s] what success can look like,” ACP CEO Jason Grumet said in the briefing. Right now, he added, many industry players are in a holding pattern until more clarity develops around tax and trade policy.

Why is the energy storage industry important?

“The energy storage industry is providing essential power when needed most while boosting domestic manufacturing and creating jobs across the country,” said Jason Grumet, CEO of ACP.

How much money will the ACP invest in battery storage?

and subscribe to the . The ACP has committed to investing \$100 billion over the next five years to build and buy American-made battery storage.

Why is the battery industry investing in the United States?

The industry’s investment will advance a manufacturing expansion in the United States with the aim of enabling American-made batteries to meet 100% of domestic energy storage project demand.

How many states have energy storage projects under construction?

The need for energy storage resources continues to be strong across the country, as 31 states currently have energy storage projects under construction.

## 100 billion energy storage policy
