## Overview

---

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF seeks to track the investment results of an index composed of U.S. and non-U.S. companies involved in energy storage solutions aiming to support the transition to a low-carbon economy, including hydrogen, fuel cells and batteries.

Should energy storage project developers develop a portfolio of assets?

12 PORTFOLIO VALUATION Developing a portfolio of assets can be seen as the inevitable evolution for energy storage project developers and private equity investors who are interested in leveraging their knowledge of the technology, expertise in project development, and access to capital.

How do I develop an operation program for energy storage assets?

Developing an operation program for energy storage assets will encompass a number of components. A central components will be a centralized Network Operating Center (NOC) that provides insights leveraging the energy management system that is used to manage and control the different assets in the portfolio.

Should energy storage projects be developed?

However, energy storage project development does bring with it a greater number of moving parts to the projects, so developers must consider storage's unique technology, policy and regulatory mandates, and market issues—as they exist now, and as the market continues to evolve.

Should energy storage projects have a scalable end of life process?

As the number of energy storage projects grow in scale and age, developing a responsible and scalable end of life process will rise in importance: for government regulators (reduce landfill totals), project developers, lenders, and insurance providers (reduce cost and liability exposure), and OEMs

(increase possible raw material source). 7.

What is energy storage technology development & deployment?

, 2020 to set goals for energy storage technology development and deployment. The vision for the program is for the DOE to foster the same type of advancement and use of energy storage technologies as was the result of other DOE programs supporting solar and wind technologies.
