What is a battery storage power station?

A battery storage power station is a device designed to output power at its full rated capacity for several hours. It can be used for short-term peak power and ancillary services, such as providing operating reserve and frequency control to minimize the chance of power outages.

What is a battery storage power plant?

A battery storage power plant is a large-scale energy storage system that uses batteries to store and supply power. Unlike uninterruptible power supplies (UPS), battery storage power plants are larger and typically house the batteries in separate structures, such as warehouses or containers, for safety and security.
