CHINA ENERGY RESERVE AND CHEMICALS GROUP COMPANY LIMITED 1981 [1] 2010 [2] 30% 26.85% /

Its gross domestic product (GDP) grew by 5.0% in 2024, in line with a government target of around 5% growth, however, growth estimates across sources vary and indicate that China's GDP grew by 2% to 3%. Stimulus measures in the second half of the year as well as increased exports at the end of the.

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic. In the selection box above you can also add or.

Reserves = proven energy resources economically exploitable at current prices and using today's technology. Resources = proven energy resources as well as unproven but geologically possible resources that may be exploitable in the future. Years of reserve and resource availability based on 2019.

China has discovered deep shale gas reserves in two major gas fields in the southwest, each holding more than 100 billion cubic metres (bcm) of proven reserves, as the country continues its push for greater energy security. The state-owned China Petroleum and Chemical Corp (Sinopec) said late. What is China's per-capita energy reserve?

China's per-capita energy reserve is considerably lower than the world average. The per-capita average of coal and hydropower resources is only about 50% of the world average, whilst the per-capita average of oil and natural gas reserves is only about 6.7% of the world average.

Which type of energy consumption grew the most in China?

However, natural gas had the second-largest increase in primary energy consumption (7.4%) after petroleum and other liquids (8.6%). Although coal accounted for the largest share of primary energy production, it grew the least year on year, at 1.3%. Coal still accounted for most (62%) of the energy consumed in China (Table 1).3.

Will China add 60 mln barrels of oil to reserves in 2024?

"China Data: 2024 Crude Throughput Falls 2% to 14.19 Mil b/d; GDP Grows 5%." S&P Global Commodity Insights, January 17, 2025. U.S. Energy Information Administration, International Energy Statistics and estimates. Aizhu, Chen. "China Asks State Firms to Add 60 Mln Barrels of Oil to Reserves, Vortexa and Sources Say." Reuters, July 4, 2024.

Did China increase natural gas consumption in 2023?

66 U.S. Energy Information Administration, International Energy Statistics and estimates; Vortexa (accessed January 2025); Aloulou, Faouzi, and Victoria Zaretskaya. "China's natural gas consumption, production, and imports all increased in 2023.", U.S. Energy Information Administration (EIA), August 14, 2024.

Are China's energy policy reforms reshaping crude oil storage?

China's sweeping energy policy reforms are reshaping the landscape of the

country's crude oil storage. According to the International Energy Agency (IEA) and Kayrros, China recorded an estimated 82-million bbl increase in crude inventories during second-quarter 2025.

What is China's new oil reserve policy?

In line with the new policy, national oil giants China National Petroleum Corp. and China National Offshore Oil Corp. launched dedicated oil reserve subsidiaries in February. In May, the Commercial Reserve Sub-Committee was established under the Petroleum Chamber of the All-China Federation of Industry and Commerce.
