Established in 1995, Trintfar is a high-tech enterprise of automatic welding equipment integrating scientific research, development, manufacturing and sales. As a national high-tech enterprise, after . Genuine Product with Excellent Quality: 12 months warranty. Our machines are strictly complied.

The Energy Storage Welding Machine is a key item within our extensive Laser Welding Machine selection. To ensure supplier reliability, check their track record, customer reviews, industry certifications, and partnerships. Request demonstrations or samples to assess machine performance. Collaborating.

1) DC welding, welding current is DC, without the disadvantage of AC zero crossing and discontinuous heating of workpieces, heat concentration, and improved welding thermal efficiency. 2) Especially suitable for welding non-ferrous metal materials and some difficult to weld materials, the welding.

The stored energy is discharged through a welding transformer, converting it into low-voltage, concentrated, stable pulse current. The resistance heat generated at the contact points of the welded workpieces melts the metal for welding. No need for current-limiting resistors, reducing heat sources.
