Document 136 outlines the strong regulatory framework for energy storage that has been in place for the last two months, aimed at creating a new pricing mechanism for energy storage as part of the “New Regulation” initiative. This document was released by the National Development and Reform.

The following energy storage standards are included: Technical Specification for Grid-Connection Acceptance of Electrochemical Energy Storage Stations  
This standard applies to the grid-connection acceptance of newly built, reconstructed, and expanded electrochemical energy storage stations.
