# Energy storage container lock rod assembly

## Overview

---

What is a shipping container door locking rod?

Shipping container doors are fitted with 2-4 vertical locking rods that enable opening, closing, and locking of container doors. This INSTA Container Door Locking Rod has a heat-treated galvanized finish, making them able to withstand rigorous environments. Use these locking rods to replace or add to your shipping container door.

What is a Insta container door locking rod?

This INSTA Container Door Locking Rod has a heat-treated galvanized finish, making them able to withstand rigorous environments. Use these locking rods to replace or add to your shipping container door. Each locking rod includes the handle and top and bottom cams, mounting parts and cam locks (keepers) are not included.

Can I use Insta locking rods to replace or add a shipping container door?

Use these locking rods to replace or add to your shipping container door. Each locking rod includes the handle and top and bottom cams, mounting parts and cam locks (keepers) are not included. Call us today if you have any questions regarding our INSTA products.

What is a container door locking system?

The system ensures that container doors are securely locked and protects valuable cargo during sea transport. The replacement door lock part of the door locking system is an essential part of securing the cargo inside the container. The price depends on the components required for the door locking system and the number of containers.

What are storage container security locks?

The right storage container security locks are a crucial part of any shipping container door hardware inventory, and crucial to all door hardware designed

for shipping. They are easy to install, and just as reliable as the rest of our shipping container parts. Our door hardware inventory has the reliable durable parts for your business.

What are spare parts for container door locking systems?

Spare parts for container door locking systems include container door latches, handles, door latches, handle covers and other components shown in the drawing to ensure the proper functioning of the door locking system. These components are designed to withstand harsh transport conditions.
