

Overview

Will Poland have a power storage system?

PGE Group has obtained the first license promise in Poland for electricity storage. Yes, Poland will have a power storage system. The storage system will be set up at the 716-MW Żarnowiec pumped-storage power plant with 3,600 MWh of storage capacity.

Will PGE build a battery energy storage system in Poland?

Polish state-owned power company PGE Group is planning to build a battery energy storage system (BESS) of at least 200 MW/820MWh in the north of Poland. The project has obtained the first license promise in Poland for electricity storage, PGE said in a press release.

What is the largest energy storage system in Europe?

The large-scale, battery energy storage system with a power of over 200 MW and a capacity of over 820 MWh at the Żarnowiec peak pump power plant is set to be the largest installation of its kind in Europe.

What are the new energy storage rules in Poland?

Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System. Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.

Will Europe's largest large-scale energy storage facility be built?

In the vicinity, Europe's largest large-scale energy storage facility will soon be built, which will assist in balancing the National Power System and facilitate the integration of the Baltic Sea wind farms being built. "We currently possess a total of 1.5 GW of peak-pump power capacity.

When did PGE install a modular energy storage facility?

In 2020. PGE commissioned the first modular energy storage facility in Rzepedzi, Podkarpacie, in Poland. The installation with a capacity of approximately 2.1 MW and a capacity of 4.2 MWh was designed to support the reliability of the local distribution network.
