

JH Solar

Energy storage product quality insurance

Overview

Why do you need warranty insurance for your energy storage system?

Our warranty insurance solutions help to secure your sustainable business in the long run. Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more.

What do insurance companies look for in a storage company?

Insurers consider balance-sheet support and look for a developer to make a guarantee that is similar, if not stronger. In the context of energy storage, there are usually two types of warranties. First, there is a product warranty, which is a guarantee against defects.

Why do we need reliable energy storage systems?

Renewables like wind and solar energy are intermittent by nature. To successfully master the energy transition, reliable energy storage systems are a must to provide the necessary supply stability.

Is fire safety a key consideration in battery energy storage?

Fire safety has become a key consideration in the burgeoning battery energy storage industry. Adam Shinn, Michael Cosgrave and Ross Kiddie report on efforts to mitigate the risks of thermal runaway and the future of BESS insurance.

How long do energy storage systems last?

Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As a manufacturer and system integrator you have to provide your customers with warranties.

Are battery energy storage systems transforming the energy landscape?

The energy landscape is undergoing a profound transformation, with battery energy storage systems (BESS) at the forefront of this change. The BESS market has experienced explosive growth in recent years, with global deployed capacity quadrupling from 12GW in 2021 to over 48GW in 2023.

Energy storage product quality insurance

IEC Standard 1530 Quality assurance ...

IEC Standard 1530 Quality assurance requirements for the manufacture, storage and distribution of aviation fuel to airports (A4) Home » Technical and innovation » Publications » Petroleum product storage and distribution »

Battery energy storage systems , BESS

Battery energy storage (BESS) offer highly efficient and cost-effective energy storage solutions. BESS can be used to balance the electric grid, provide backup power and improve grid stability.
