# Explosion-proof energy storage station

## Overview

---

Can a lithium ion battery cause a gas explosion in energy storage station?

The numerical study on gas explosion of energy storage station are carried out. Lithium-ion battery is widely used in the field of energy storage currently. However, the combustible gases produced by the batteries during thermal runaway process may lead to explosions in energy storage station.

Are lithium-ion batteries safe for energy storage power stations?

The safety of lithium-ion batteries affects the safety of energy storage power stations. Analyzing the thermal runaway behavior and explosion characteristics of lithium-ion batteries for energy storage is the key to effectively prevent and control fire accidents in energy storage power stations.

Do lithium-ion energy storage stations need a vent panel?

The latest NFPA 855-2023 requires that lithium-ion energy storage stations (Li-BESS) larger than 20 kWh must install explosion protection devices. The vent panel is the preferred protection device for Li-BESS. In this study, the motion equation of the vent panel was derived.

Do explosion power and mass affect Li-BESS vent panels?

To investigate the effect of explosion power and mass on Li-BESS vent panels, the experiment tested the venting efficiency of standard vent panel at four different hydrogen concentrations. Then, four different unit area mass vent devices were tested under 19 % hydrogen concentration. 4.1. Effect of explosion power.

Do explosion vent panels reduce explosion overpressure?

With the increasing utilization of explosion vent panels for gas explosion protection, relevant research has begun to emerge. Bauwens conducted experiments on venting hydrogen concentrations ranging from 12 % to 19 %

in a rectangular space, analyzing the relationship between venting area and reduced explosion overpressure .

What happened at an APS battery energy storage station?

In April 2019, a fire broke out at a battery energy storage station deployed by APS in Peoria, Arizona, USA. An explosion occurred upon opening the compartment door, resulting in injuries to 8 firefighters .
