Georgia energy storage enterprise plant operation

Overview

This 57.5-megawatt battery energy storage system, approved in the 2023 Integrated Resource Plan Update, will store excess energy produced during periods when the demand for electricity is lower, for use when the demand is higher, such as on cold winter mornings using the existing retired Plant.

This 57.5-megawatt battery energy storage system, approved in the 2023 Integrated Resource Plan Update, will store excess energy produced during periods when the demand for electricity is lower, for use when the demand is higher, such as on cold winter mornings using the existing retired Plant.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. The BESS projects were authorized by the Georgia Public Service Commission (PSC) through.

Georgia Power senior VP and senior production officer, Rick Anderson, cuts the ribbon on the utility's first 65MW BESS project in 2024 alongside Kim Greene, president and CEO of Georgia Power (second from right), with Georgia Public Service Commissioners Tim Echols (left) and Fitz Johnson. Image:.

This 530-megawatt battery energy storage system will consist of two phases, approved in the 2022 Integrated Resource Plan (IRP) and 2023 IRP Update. Courtesy: Georgia Power. Georgia Power's 2025 Integrated Resource Plan (IRP) filed with the Georgia Public Service Commission (PSC) anticipates.

Product Model
 HJ-ESS-215A(100KW/215KWh)
 HJ-ESS-115A(50KW 115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled
