Groschopp energy storage motor

Overview

What is a Groschopp motor?

types, voltage, speed, torque and power. Groschopp is an American manufacturer of fractional hp motors and gear motors for original equipment manufacturers (OEMs). We offer a range of standard options, but specialize in industrial motors and gearmotors that are modified to meet your needs.

What does it mean to partner with Groschopp?

It uses a [.] Partnering with Groschopp means working with a small electric motor and gear motor manufacturer that strives for the American standard of quality. It means having a team of motor experts to find the best standard or custom solution for your application.

What is a Groschopp motor speed controller?

Inline reducers (parallel shaft and planetary) are an ideal match for motors with high input speeds, or when gearmotor efficiency is important. A Groschopp motor speed controller is designed for precision and efficiency. We offer controls for Inverter Duty & Brushless DC gearmotors.

Why should you choose Groschopp?

Groschopp is your full-range supplier and strong partner for the entire drive train. Development, design, manufacturing and service closely interlinked with our product portfolio - from a single source. Only the best for your production. Due to high quality of wear parts and innovative designs you achieve long maintenance and inspection cycles.

Who is Groschopp?

For more than 70 years, Groschopp has been working closely with experts from a wide range of industries. A time in which we have gained a lot of experience in niches and built up a portfolio full of successful projects and partnerships.

Why should you choose a 3D printing company in Groschopp?

In Groschopp you will find the competent partner who will be at your side from consulting, through project planning to commissioning of your plant and who will consistently pursue the common goal of "smooth and efficient processes". Just a few years ago, 3D printing was mainly used in prototype construction. This has now changed.

Groschopp energy storage motor

**Efficient
Higher Revenue**

- Max. Efficiency 97.2%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

**Intelligent
Simple O&M**

- IP66 Protection Degree: support outdoor installation
- Smart 1V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Surge SPD: prevent lightning damage
- Battery Reverse Connection Protection

**Flexible
Abundant Configuration**

- Plug & Play, UPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. Current Inverter Thermal
- ARC Function (Optional): when an arc fault is detected the inverter immediately stops operation

Groschopp energy storage motor

The low-voltage-servo-motor of the "Black Panther"-series made by Groschopp distinguishes itself by having extreme high power density, exact positioning and high energy efficiency.

E-Mobility

The basic idea is to design and produce two high-speed motors, combined with a double-reducer gear and a suitable power electronics unit (to be developed), as an axial drive module.
