Haiwu energy storage air conditioner

Overview

HIEC indirect evaporative cooling unit is an energy-saving air conditioner that makes full use of natural cold sources to cool the data room. The indoor and outdoor air can realize heat transfer without exchanging. Is Haiwu a good choice for base station construction?

The market is in urgent need of a telecom station building scheme with high efficiency and energy conservation. The customized solution of integrated energy-saving cabinet proposed by Haiwu can be flexibly assembled according to the construction environment and business. It is an ideal choice for base station construction.

What is Haiwu outdoor C-ran cabinet?

In order to reduce the investment in base station construction and accelerate telecom construction, the traditional access network architecture has evolved to C-RAN architecture. Haiwu outdoor C-RAN cabinet adopts modular and standardized reliability design to ensure that all subsystems are highly compatible, universal and integrated.

How many branches does Haiwu have?

Haiwu, with head office in Beijing and R&D and manufacturing plants in the Guangdong province, has its own consulting and research institute, 8 subsidiaries and 29 branches. It employs more than 5,000 certified technical service engineers in more than 500 after-sales service outlets across the country to provide high-quality service.

What is Haiwu test center?

Haiwu Test Center covers a total area of 215,200ft², and it is the base of all the company R&D, testing and quality assurance activities on products, components and raw materials.

Haiwu energy storage air conditioner

Haiwu
