# Harbour energy storage uk project

## Overview

---

Where is Harbour Energy located?

Harbour Energy offices at Hill of Rubislaw, Aberdeen. Wullie Marr North Sea operator Harbour Energy (LON:HBR) is set to withdraw from its share of the Medway Hub Camelot carbon capture and storage (CCS) project. Harbour inherited its 50% share in the CCS project licence following its recent £11.2 billion acquisition of German rival Wintershall Dea.

Why should you invest in Harbour Energy?

Harbour Energy has a leading CO<sub>2</sub> storage position in Europe and the UK with net storage resources of over 650 million tonnes of CO<sub>2</sub>. It offers the potential for long-term and stable cash flows which are complementary to Harbour's business and provide a diversity of revenue that is not linked to oil and gas prices.

How can harbour energy help the UK achieve net zero?

At Harbour Energy, we are excited to be leading this project together with non-operated partner bp, and working closely with our Cluster members to help the UK achieve net zero by capturing, transporting and storing CO<sub>2</sub> at scale, safely and cost-effectively.

Does harbour have an interest in greenstore CCS in Denmark?

Harbour also has an interest in the cost-advantaged, onshore Greenstore CCS project in Denmark, which is being progressed through the appraisal work programme. Harbour has a 40% operator interest, with Ineos as our non-operated partner alongside the Danish state.

Does harbour still have a CCS licence?

Harbour remains involved in the Acorn and Viking CCS projects in Scotland and the Humber respectively. The North Sea Transition Authority (NSTA) awarded Synergia and Wintershall the licence covering the depleted Camelot

gas field in August 2023.

## Harbour energy storage uk project

---

### United Kingdom , Harbour Energy

Led by Harbour Energy (60% interest, operated), with non-operated partner bp (40% interest), Viking aims to transport and store CO<sub>2</sub> in secure offshore storage sites in the UK's Southern ...

### Harbour Energy

Harbour has a leading CO<sub>2</sub> storage position in Europe Broad, pan European portfolio of CO<sub>2</sub> transport and storage projects Long term relationships with premier European emitters in hard ...
