How to find the energy storage customer service center

Overview

How do you calculate energy stores?

The following energy stores can be calculated from other quantities: Thermal Energy = (Mass) x (Specific Heat Capacity) x (Change in Temperature) Elastic Potential Energy = $0.5 \times (\text{Spring Constant}) \times (\text{Extension})^2$ Kinetic Energy = $0.5 \times (\text{Mass}) \times (\text{Speed})^2$ Gravitational Potential Energy = (Mass) x (gravitational field strength) x (change in height).

How do I Register my sigenergy equipment?

After WLAN has been configured, please go to Sigenergy website to register the equipment, or through mySigen APP to quickly register your equipment. 1. Make sure you are connected WLAN or make sure the home page shows the connection is OK. 3. If all these steps do not work, please contact the field Sigenergy service center.

How do I Register my sigenergy inverter?

After the inverter is powered on, the external protection earth conductor should be kept connected. WLAN configuration is finished, but there is no monitoring data. After WLAN has been configured, please go to Sigenergy website to register the equipment, or through mySigen APP to quickly register your equipment.

What information is collected during a customer service call?

Service usage records (access date and time), IP address, and communication content (When you talk with a consultant at the customer service center, your call will be recorded to safeguard your rights and improve the quality of services.) 2. Purposes of Collecting and Using Personal Information
