# Large energy storage assembly plant

## Overview

---

On December 10th, EVE Energy announced that Phase I of its 60GWh Super Energy Storage Plant, along with the launch of "Mr. Big," is now operational. This facility marks a milestone as the largest single energy storage factory in the industry, while "Mr. Big" is the first mass-produced large-format.

On December 10th, EVE Energy announced that Phase I of its 60GWh Super Energy Storage Plant, along with the launch of "Mr. Big," is now operational. This facility marks a milestone as the largest single energy storage factory in the industry, while "Mr. Big" is the first mass-produced large-format.

This factory is the largest single energy storage factory in the industry while Mr. Big is the first mass-produced 600Ah+ large battery cell. Innovative Technologies Support the First Release and Mass Production of Large-capacity Battery Cells In 2022, when the market was still promoting 280Ah.

The Nengchu-1 plant in China sets records with 300 MW power, 1,500 MWh capacity, and 70% efficiency, advancing green energy storage solutions. With a capacity of 1,500 MWh and a power output of 300 MW, the Nengchu-1 Compressed Air Energy Storage (CAES) plant in China has claimed global leadership in.

Tesla has started trial production at its Megapack assembly plant in Shanghai, China, state-owned news reported this week (31 December). It is the electric vehicle (EV) and battery energy storage system (BESS) firm's second major manufacturing facility dedicated to producing its grid-scale Megapack.
