# **Lithium titanate energy storage container**

## Overview

---

This system adopts the outdoor container BESS system, which contains high quality LFP battery cells, intelligent battery management system and the group technology. We can supply safe, reliable, stable power supply solutions, to provide comprehensive highly quality energy. The BESS topological.

This system adopts the outdoor container BESS system, which contains high quality LFP battery cells, intelligent battery management system and the group technology. We can supply safe, reliable, stable power supply solutions, to provide comprehensive highly quality energy. The BESS topological.

The 52kWh battery system uses LTO cells with a capacity of 35Ah. Including 9 battery sockets and 1 high-voltage box Tianjin Plannano Energy Technologies CO., Ltd., a high-tech company, focuses on the research and development, manufacturing, marketing and technical service of graphene-based materials.

With advantages of highly integration and standardization, multiple functions, convenient transportation, short construction planning and system debugging phase, LFP battery storage system in transferable container is an independent energy storage unit, including lithium-ion battery system, power.

By container integrated design, energy storage battery clusters, battery confluence cabinets, energy storage converters, transformers, power distribution cabinets and other equipment are integrated into the container. Based on the LTO material technology and high energy density cell technology with.

TITAN are veterans of the shipping container market, and over the past 35 years have become a leading provider of secure, robust containers for shipping, storage, refrigeration and offshore use. Today, we are also a name you can rely on for safe battery storage. Our containerised energy storage.
