# **New york simplifies energy storage projects**

## Overview

---

In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and.

On June 20, 2024, the New York Public Service Commission approved the Order Establishing Updated Energy Storage Goal and Deployment.

Energy storage technologies and systems are regulated at the federal, state, and local levels, and must undergo rigorous safety testing to be.

Governor Kathy Hochul today announced over \$5 million is now available for long duration energy storage projects through New York State's Renewable Optimization and Energy Storage Innovation Program. This funding will advance the development and demonstration of scalable innovative long duration.

Governor Kathy Hochul today announced over \$5 million is now available for long duration energy storage projects through New York State's Renewable Optimization and Energy Storage Innovation Program. This funding will advance the development and demonstration of scalable innovative long duration.

Energy storage has a pivotal role in delivering reliable and affordable power to New Yorkers as we increasingly switch to renewable energy sources and electrify our buildings and transportation systems. Integrating storage in the electric grid, especially in areas with high energy demand, will.

Today New York Governor Kathy Hochul announced that the New York State Public Service Commission has approved a new framework for the state to achieve a nation-leading six gigawatts of energy storage by 2030, which represents at least 20 percent of the peak electricity load of New York State. The.

Based on interconnection data and data collected by NYSERDA's Retail and Bulk Energy Storage incentive programs, this map represents the installed energy storage capacity, number of projects and annual trends for all of New York since 1990. To get started, click on the map for county-specific data.

Developers of small- and utility-scale battery storage find permitting and connecting to the energy grid is an arduous and costly process. New York plans to hold the first of three bulk energy storage procurements later this year as an Aurora Energy Research report forecasts 30 GW of in-state storage capacity by 2050. New York's 6-GW 2030 goal will "support a buildout of storage deployments estimated to reduce projected future.

Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts of energy storage by 2030, which represents at least 20 percent of the peak electricity load of New York State. The roadmap is a. What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.

Will New York deploy 6 GW of energy storage by 2030?

New York will deploy 6 GW of energy storage by 2030 under a framework approved Thursday by the New York Public Service Commission, the office of Gov. Kathy Hochul, D, said in a press announcement.

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

What is New York's energy storage goal?

New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030.

How will energy storage impact New York?

Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage. All of this while creating an industry that could employ at least 30,000 New Yorkers by 2030.

Will New York double its energy storage goal in 2022?

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released a draft road map in December 2022 showing how it would achieve its new target, including a centralized procurement mechanism to expedite solicitations and deployments.
