# **Polska power grid energy storage subsidy income**

## Overview

---

1□ For PV micro-installations registered by July 31, 2024, energy or heat storage systems are optional but encouraged. - Micro-installation capacity: 2 kW to 10 kW. - Funding amounts: · PV micro-installations: PLN 6,000. · PV micro-installations with an additional element: PLN 7,000, plus funding.

1□ For PV micro-installations registered by July 31, 2024, energy or heat storage systems are optional but encouraged. - Micro-installation capacity: 2 kW to 10 kW. - Funding amounts: · PV micro-installations: PLN 6,000. · PV micro-installations with an additional element: PLN 7,000, plus funding.

The much-awaited subsidy scheme aims to improve the stability of the national power grid and the country's energy security. More than PLN 4 billion (\$1 billion) provided by the European Union's Modernization Fund will be distributed under the subsidy scheme by the end of 2025 in a bid to bring.

The sixth edition began on September 2, 2024, offering financial support for investments in renewable energy sources. The program's budget is PLN 400 million, financed by the European Funds for Infrastructure, Climate, Environment (FEnIKS). The Minister of Climate and Environment, Paulina.

On 5 March 2025, the regulation of the Minister of Climate and Environment on the detailed conditions for the granting of public aid by the National Fund for Environmental Protection and Water Management for investments in electricity storage facilities and related infrastructure was published in.

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion). The program is co-financed by the European Union's Modernization Fund and the Recovery and Resilience.

The National Fund for Environmental Protection and Water Management has announced its plan to implement a scheme under the name "Electricity storage facilities and related infrastructure for improving the stability of the Polish electricity grid", to finance electricity and heat storage facilities.

Poland has marked a significant milestone in its energy transformation journey with the launch of a major subsidy scheme for energy storage projects. The Polish National Fund for Environmental Protection and Water Management (NFOŚiGW) announced on April 4, 2025, that it would begin accepting. What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

Why should Poland invest in energy storage facilities?

Investments in energy storage facilities are key to Poland's energy transition. They increase the flexibility of the energy system and promote the integration of renewable energy sources into the grid.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

What are energy storage subsidy programs?

Energy storage subsidy programs are an important step in modernizing Polish agriculture, increasing the share of RES and improving the energy stability of farms. BGK's Energia Plus Program and Ecological Credit offer extensive support for businesses investing in energy storage facilities between 2024 and 2025.

Why is Poland launching a grid-scale battery system?

The introduction of this storage support program marks a key milestone in Poland's energy transformation. By enabling the deployment of grid-scale battery systems, the country is strengthening its ability to integrate larger volumes of clean energy, reduce dependence on fossil fuels, and enhance power system stability.

How will the energy storage program affect the electricity grid?

In 2025, the program will continue to support the stabilization of the electricity grid. Energy storage facilities at prosumers help relieve the burden on the grid and improve the efficiency of RES installations, also affecting the benefits of

other market participants.

## Polska power grid energy storage subsidy income
