# **Romania pumped storage project planning announcement**

## Overview

---

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch. Is Romania preparing a feasibility study for a pumped hydropower project?

The Romanian Ministry of Energy said this week that state-owned energy company Societatea de Administrare Participațiilor în Energie S.A. (SAPE SA) is currently conducting a feasibility study to resume the development of the Tarnița Lăpuștești pumped hydropower project on the Someșul Cald River in Cluj County, northern Romania.

Does Romania have a battery energy storage plan?

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch.

How will Romania grow its energy storage fleet?

Romania aims to exponentially grow its energy storage fleet over the next couple of years, as it works on its plan to deliver 36% of the nation's energy to come from renewables by 2030, with 8.3 GW of solar and 7.6 GW of wind, and phase out coal by 2032.
