Sgs certification agency for energy storage equipment

Overview

What is SGS certification?

SGS provides certification services to companies wishing to ensure that their processes, products, services, or systems comply with national and international standards and regulations. ISO 9001 is an internationally-recognized quality management system (QMS) standard that ensures services and products are in line with the requirements.

What services does SGS offer?

With unrivaled experience we can provide all the required technical verifications, safety settings and factory auditing services. Contact SGS to find out how our battery testing services can help get your products to market faster.

What is SGS battery testing?

SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements. SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements.

What is an energy storage system project certification?

Assembly inspection of the Energy Storage System (optional phase). The Project Certification covers the application of several certified components for a specific Energy Storage System project and includes the following mandatory and optional phases:.

Why should energy storage systems be certified?

Comprehensive certification of energy storage systems delivers maximum stakeholder confidence. The number of wind and solar installations on different scales is increasing globally. Also, their relative share in the electricity

generation mix is increasing.

What are grid-connected electrical energy storage systems (EESS)?

To counter the intermittency or the impact of renewables on the power grid, grid-connected electrical energy storage systems (EESS) are being rapidly developed and deployed. Also EESS which are not connected to the grid supporting large industries or islands with power are used more and more.
