LNDCH4 Guyana is pleased to announce the arrival of the Backup Battery Storage System (BESS) which landed at the John Fernandes wharf today. The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery in the event of turbine.

Guyana's landmark Gas-to-Energy project reached a critical milestone with the arrival of a 30-MW backup battery energy storage system (BESS) at Georgetown's John Fernandes Wharf, according to OilNOW. The system, delivered in 22 containers by US joint venture LNDCH4, serves as emergency power.

When Barbados installed 214 MWh of storage in 2023, they sort of stumbled into a best practice we now call "island-hopping redundancy." By linking smaller battery systems across multiple parishes, they achieved 99.97% uptime during hurricane season. Could this work for Guyana's scattered river.

The Guyana Energy Agency is looking for solar installers to transport, deploy and commission solar arrays with accompanying battery storage at selected public buildings located across four regions of the country. The deadline for applications is April 1. The state-owned Guyana Energy Agency has.
