Which energy storage systems are best for commercial & commercial facilities?

AlphaESS industrial and commercial energy storage systems can provide the one-stop C&I energy storage solution for commercial and industrial facilities. Our solar PV and battery storage solution help maximize energy independence and reduce grid power demand. Residential & commercial battery energy storage systems available.

What are commercial and industrial energy storage solutions?

Our commercial and industrial energy storage solutions offer from 30kW to 30+MW. We have delivered hundreds of projects covering most of the commercial applications such as demand charge management, PV self-consumption and back-up power, fuel saving solutions, micro-grid and off-grid options.

What is a C&I energy storage system?

A C&I (Commercial and Industrial) energy storage system is an energy storage solution designed for commercial and industrial applications, such as factories, office buildings, data centers, schools, and shopping centers.

What is a commercial battery storage system?

Our commercial battery storage systems utilize demand charge management, dynamic capacity expansion, and demand-side response to improve commercial and industrial energy storage and enhance new energy distribution. Project features 5 units of HyperStrong's liquid-cooling outdoor cabinets in a 500kW/1164.8kWh energy storage power station.

What are energy storage solutions?

Our energy storage solutions are designed to ensure businesses will have power to meet their facility's critical power needs. For many companies the

most significant portion of the electric bill are the demand charges which are based on the highest amount of power drawn during any 15-minute interval billing period.

What are the benefits of energy storage systems?

Systems can be designed for single, split or 3 phase electrical architecture and easily integrates with a broad selection of inverters and energy management systems. Improving energy resilience with an energy storage system that allows for critical loads backup. Saving money by reducing or eliminating utility peak demand charges.
