A just-commissioned solar and battery storage system will reduce diesel consumption by at least 80% at a base for 300 humanitarian workers in South Sudan, managed by the UN's International . Several African countries have formally expressed interest to join the groundbreaking Battery Energy.

The East African country has an electricity access rate of 8.4% (as of 2022)

Credit: Ezra Group A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System.

While the global energy storage market balloons into a \$33 billion industry [1], this East African nation faces unique challenges that make energy storage integration not just important – but survival-critical. South Sudan's energy scene resembles a patchwork quilt: Yet beneath this bleak picture.

The 20 MW solar PV plant, located in Juba, the capital city, will have a 14 MWh battery energy storage system & will connect 16,000 households in the world's least electrified country. This project marks South Sudan's first public-private partnership (PPP) in the renewable energy sector. Ezra.
