# **State power investment poland energy storage**

## Overview

---

The European Commission has approved a €1.2 billion Polish scheme to support investment into electricity storage facilities to help reduce the reliance of the Polish electricity system on fossil fuels and to facilitate the smooth integration of variable-generation renewable energy into the national electricity system. Does Poland need a state aid package for energy storage?

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media The European Commission (EC) has approved a €1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

What is Poland's energy storage program?

The program, "Electricity storage facilities and infrastructure for improving the stability of the Polish power grid," is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

Why should Poland invest in energy storage facilities?

Investments in energy storage facilities are key to Poland's energy transition. They increase the flexibility of the energy system and promote the integration of renewable energy sources into the grid.

Will Poland support new electricity storage facilities in 2024?

In an announcement released on October 3, 2024, the executive arm of the European Union said that the Polish scheme will support the installation of at least 5.4 GWh of new electricity storage facilities. The policy will support only

newly installed storage facilities with a capacity of at least 4 MWh.

How can energy storage support Poland's electricity system?

By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system. The storage support program is expected to begin accepting applications in the second quarter of 2025. Full details and deadlines will be published by the NFOŚiGW.
